TECHNICAL SKILLS

Languages & Frameworks: Python, FastAPI, PHP, Laravel, JavaScript, ReactJS, REST APIs, GraphQL, WebSockets, HTML/CSS
AI / ML Systems: LangGraph, LangChain, Multi-Agent Systems, RAG, Qdrant, Text-to-SQL, Azure AI Foundry, GPT-Live-1
Databases & Cloud: MySQL, Elasticsearch, Redis, AWS (ECS, ECR, S3, CloudFront), Docker, Linux, Nginx, Git, CI/CD

EXPERIENCE

Software Developer | Publicis Digital Experience (Publicis Groupe)

Jan 2025 – Present

Mumbai, India

- ▶ **Project: HINCOL — Enterprise B2B Platform (77+ Modules)** | *Laravel, SAP, AWS S3, MySQL* **Wow@Work Award**
 - Created a multi-criteria **Lead Scoring & Qualification engine** processing 800–1,500 leads/month across 5 zones, cutting qualification from ~15 min to < **1 s** and saving 60–80 hours/month of manual vetting.
 - Designed an event-driven **Key Account Management** engine for 2,500 active accounts with **S3** audit trails, replacing quarterly spreadsheet reviews with automated batch re-evaluation and a cross-sell whitespace matrix.
- ▶ **Project: HincolBot — Full-Duplex Voice Agent** | *FastAPI, WebSockets, Azure AI Foundry, Redis*
 - Reduced CRM/ERP data-entry time by **80%** (15 min → < 2 min per opportunity) across 5 national zones by building a full-duplex voice application with **Redis** conversational memory and persistent session summaries.
 - Implemented **24 kHz PCM16 bidirectional streaming** over authenticated WebSockets using GPT-Live-1, achieving < **200 ms** audio-response latency with real-time barge-in.
- ▶ **Project: Strategic Sales Agent** | *LangGraph, Qdrant, Text-to-SQL, LangSmith, Redis*
 - Built a **LangGraph StateGraph** agent with hybrid entity disambiguation across 4,628 master vectors (**Qdrant** dense retrieval + lexical SQL), achieving **98.4%** accuracy over 500 conversational test cases.
 - Engineered a read-only **Text-to-SQL** service with vector schema discovery, sensitive-column masking, SSE streaming, and HITL safeguards including **Zero-Delete** protection and zone-scoped RBAC.
- ▶ **Project: P.D. Hinduja Hospital — Healthcare RAG** | *Python, FastAPI, Qdrant, LangChain*
 - Developed a **Healthcare RAG** system serving **260+ doctors** across **90 specialties** for symptom triage, doctor discovery, and real-time OPD booking across 2 hospital units (Mahim & Khar).
 - Implemented **hybrid retrieval** (70% dense / 30% BM25) over 3,096 clinical chunks with **cross-encoder reranking** (`bge-reranker-base`), narrowing pools to 6–12 grounded chunks.
 - Integrated async multi-turn state machine with **HIS**, SMS OTP, and **BillDesk** payments (HMAC-SHA256); stress-tested with 250 concurrent bookings — **96.6%** pass rate across 320+ automated tests.

Software Developer & Delivery | Razorfish (Publicis Groupe)

Jan 2023 – Dec 2024

Mumbai, India

- ▶ **Project: Citroën & Disney+ Hotstar Digital Platforms** | *Drupal, PHP, Docker, AWS ECS, Redis*
 - Built the **Citroën Dealer Locator REST API** aggregating Stellantis/PSA global APIs and localized databases for **1.5 M+** monthly visitors with 50+ RPS peak traffic during national campaigns.
 - Implemented geo-spatial dealer matching with **Haversine distance** (< 350 ms latency); deployed containerized microservices on **Docker, AWS ECS/ECR, S3, CloudFront, and Redis**.
 - Delivered 12+ REST API modules in **Drupal/PHP** with automated vehicle-data ingestion across 1,000+ dealers; built **Disney+ Hotstar** campaign CMS and boosted page-load performance by **25%**.

Software Developer & PM Intern | Publicis Media (Publicis Groupe)

Jan 2022 – Jul 2022

Mumbai, India

[View Certificate](#)

- ▶ **Project: Headless E-Commerce Platform (Magento 2)** | *PWA Studio, React, GraphQL, Elasticsearch*
 - Developed custom **Magento 2** modules for an e-commerce POC with PWA Studio using PHP, JavaScript and React; built **GraphQL** APIs with **Elasticsearch** and MySQL. Coordinated Agile sprint delivery (Gantt/WBS) across cross-functional teams.

EDUCATION

Sardar Patel Institute of Technology (SPIT), Mumbai

2021 – 2022

Master of Computer Applications — Machine Learning; CGPA: 8.65 / 10

CERTIFICATIONS

AI-900: Microsoft Azure AI Fundamentals — Microsoft
Master RAG: Retrieval-Augmented Generation Systems — Udemy
Software Architecture & Design of Modern Large Scale Systems — Udemy
Microsoft Technology Associate (MTA): Security Fundamentals — Microsoft
GitHub Copilot for Developers: Code Faster With AI Agents — Udemy
